03 FILLING SETTING

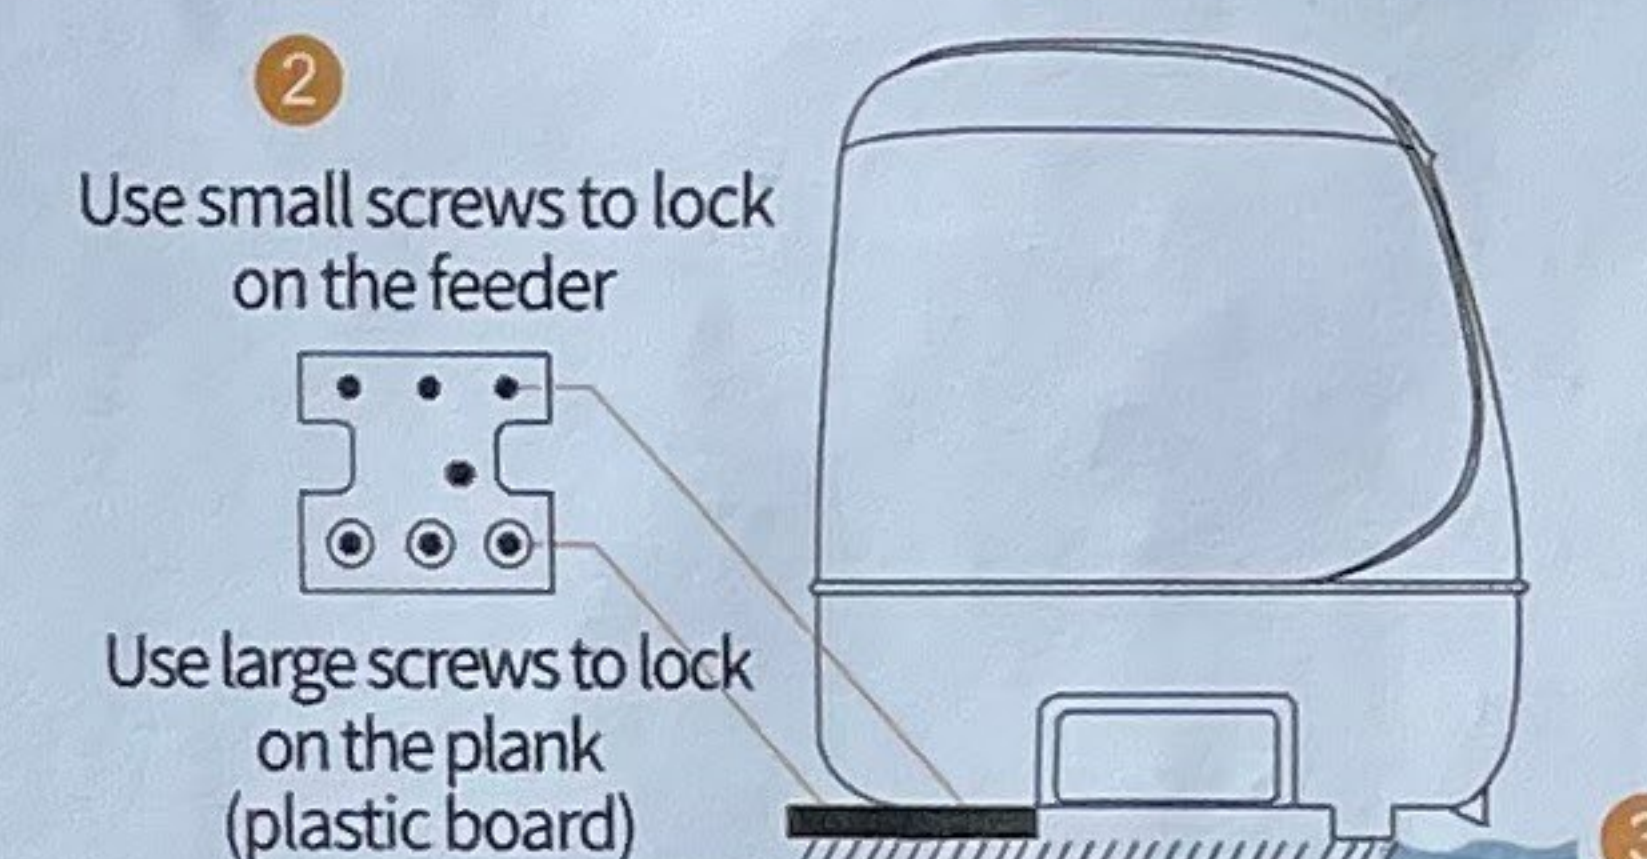

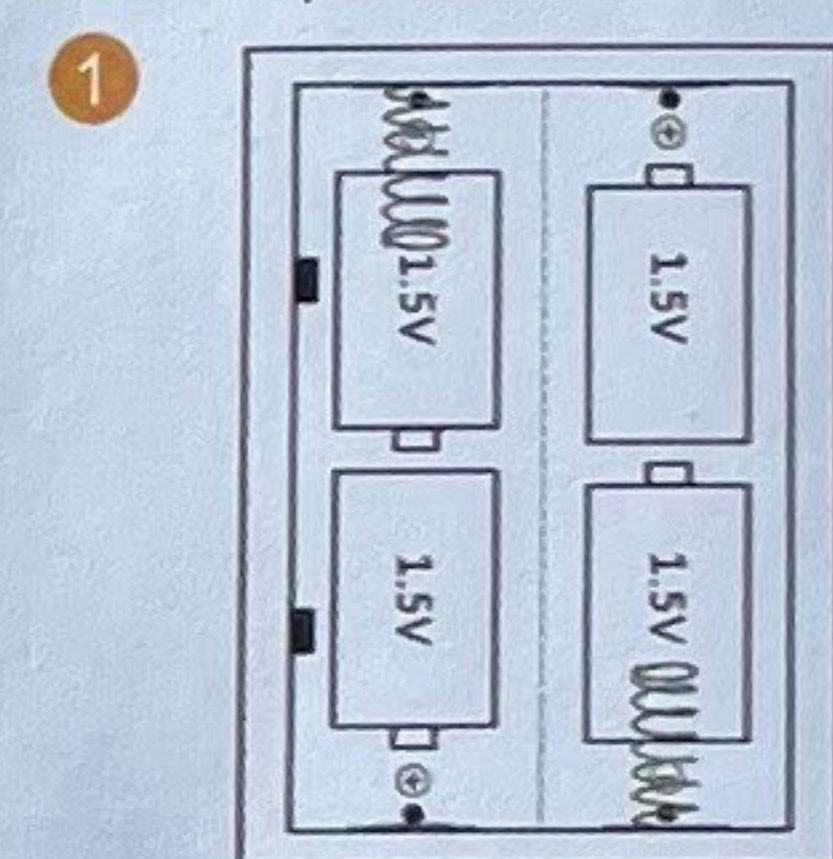

Open the container cover and clean the drum before filling a amount of feed. Then place the cover back. The pond feeder is suitable for pellet feed ($d \leq 9\text{mm}$).

- S baffle
The feed is 2-4mm in diameter and can be fed for 15-20g per second.
- M baffle
The feed is 4-6mm in diameter and can be fed for 15-20g per second.
- Without baffle
The feed is 6-9mm in diameter and can be fed for 30-38g per second.

04 INSTALLATION SETTING

1. The battery compartment is on the bottom, open it then put in 4 x C alkaline batteries. (Do not use rechargeable or carbon batteries.)
2. The feeder can be placed directly near the fish pond, and it can also be fixed to the plank by using plastic board.
3. Place the pond feeder above the water which following picture shows can reduce the rats problem.

05 PRECAUTIONS

1. Safety

- 1) Read instruction carefully before usage.
- 2) Pond feeder is suitable for outdoor use.
- 3) Prevent feeder from dropping into the water.

2. Maintenance

- 1) Always keep food container clean and dry.
- 2) Always remove moisture and old food.
- 3) Please remove batteries from pond feeder before storage.

3. Trouble diagnosis

- 1) Equipment does not work
 - a. Please check whether alkaline batteries are used, ensure the battery power is sufficient and the battery is not up to the restricted date. (Generally there has a limiting date label on the bottom of the negative electrode of the battery).
 - b. Please check whether the anode and cathode of batteries are installed correctly and whether using rechargeable batteries.
 - c. Please check whether the baffle of the ⑤ built-in outlet is installed correctly, and then check whether the ⑥ outlet of the feeder is blocked (if blocked, please clean it as soon as possible), so as to ensure that ⑥ the flexible discharge unit can rotate normally (if there is a fault, please replace it as soon as possible).
- 2) Low power mode
if the LCD display shows "LO" which is a low battery alarm, please replace the battery as soon as possible.
- 3) If food gets stuck in the food release port, remove the baffle.
- 4) Choose the size of the baffle to suit the food size.
- 5) If LCD displays an unusual text indicates that the battery is low, need to change the battery or charge it.
